Website Client Questionnaire

prepared by FuMing Young

To help us design a website which fulfills the needs and preferences of your business, please take some time and complete the following questionnaire.

1. **Goal & Purpose.** What is the #1 goal and purpose for the website? If it is to communicate something, what is the main message? If it is for the website visitor to perform an action *(for example, pick up the phone and call, make an order, make online payment, etc.)*...what is the main action?

   #1 goal: bring more patients into the door, by being findable and informative for somebody looking for medical services, and then booking an appointment to be seen.
   The other very important purpose is to provide information about the clinic and the work we do, especially organisations (embassies, schools, companies) looking to partner with us (and bring us patients).

2. **Design Description.** Using 3 adjectives, how would you describe your preferred design/style for the website? *(for example: professional, simple, elegant, minimalistic, decorative, retro, luxurious, efficient, uncluttered, dark, classic, flowery, artistic, etc.)*

   Professional. Informative. Uncluttered.

3. **Original Logo Artwork.** Could you please send me a high-quality version of the logo? *(It would be best to get the original graphic from the logo designer which should be in a vector-based format such as Adobe Illustrator (.ai) or .eps or .svg.)*

   I will share the Jpeg versions in the cha. If you need something different we could contact our logo designer, Pasha +996 771 317 913

4. **Color Preferences.** In general, would you prefer a dark background website or a light background website? Also, please identify the main color you'd like to see on the website and the secondary color. *(Please submit images which include these colors so we know precisely which color hue/tone, etc.)*

   I personally prefer a light background. Main colour would be yellow-orange (as in the logo). Secondary color grey (also as in logo)

5. **Main Sections.** Please list the main sections of your website *(for example, "Home", "About", "Products", "Services", "Blog", "Contact")*

   Home - tagline, buttons to book consultation and further discover website. Maybe insta feed.
   About - brief overview, history, what we bring to KG
   Medical Services - consultations, labs etc
   For corporate clients
   Medical education
   Team - short bio of team members (not only doctors)
   Mobile clinics/charitable work
   Contact

6. **Target Customer.** Who is your target customer *(demographic, income-level, age, interest, comfort level with technology)*? Please describe the main types of website visitors you expect and would like the website to attract. *(Please also include which languages the website must support)*

   1) potential patients - people with a medical complaint looking for a doctor. Locals, tourists/travellers, expats residing in Bishkek
   2) organisations (schools, companies, embassies) looking for a clinic to collaborate with for regular medical examinations (we offer yearly staff-checkups, special deals for students etc)
   3) Hospitals, medical schools and residents and students: to collaborate with us in training residents and medical students.
   → so, very broad target customers. Demographic - locals and expats. Age - probably more middle-aged and above, as younger ppl use instagram. Income-level: middle-class and higher due to our pricing. Interest - in medical services.

Comfort level with technology - low-medium. Languages - english, kyrgyz and russian

7. **Top 3 Competitors' Websites.** Please list the websites for your top 3 competitors and describe briefly what you like about their websites and what you don't like about them.

   eldikfmc.com: + approachable medical information (directed at you). - landing page too much text, quite cluttered, not up to date (many of the pictures are very old), no information on the team or history
   greenlukas.uz: + info on team with pictures. Feels less overwhelming at first site. - unclear if hospital or clinic? Several names (green lukas vs lukas clinic vs all friendship hospital - what is it)? In total very little info on site, and what is is quite confusing.
   malish.kg + informative, including history and FAQ section. possibility to book consultation online - services section overwhelming

8. **Unique Offering.** Why would a website visitor want to become your customer rather than one of your competitors? (What is something unique which your business offers which your competitors do not?

   Evidence-based and international medicine. Charitable heart of the clinic - mobile clinics in the regions.

9. **Top 3 Websites.** Please list top 3 websites which you like from a style and design perspective *(they do NOT need to be in the same industry as your website...because we're only interested to find out your style preferences)*. Please briefly describe what you like and don't like for each of the 3 websites.

10. https://stripe.com/en-ch
    https://www.kinderpraxis-emme.ch/ - this is a swiss medical center. I like the start page with the quote and the kids drawing, and the way the menu at the top that is always there. I don't like Arial font
    https://charlesmcdonaldmusic.com/# - I found this while researching carrd. I like the simple layout and unclutterdness with still a lot of pages to go to, and the menu that always leads back
    https://www.freddy11.ch/ - I like the simplicity of the design, I do not like the animated pictures at the top of the separate pages

11. **Detailed Requirements for Special Functionality.** (This could include online payments, shopping cart, membership, password-protected content, online booking/scheduling, etc.)

    Instagram feed would be good as we are most active there
    If possible to explore online booking system and how complicated that would be
    Good ways to keep it up to date - team changes, price changes, new photos etc
