Birth preparation courses by our certified Doula

Website requirements

Nr 1 purpose: get more patients into the door

- being visible and findable
- easily booking an appointment

secondary purpose:

- provide information about the clinic and the work we do, especially for organisations looking to partner with us

Website requirements - Target customer

1) potential patients - people with a medical complaint looking for a doctor. Locals, tourists/travellers, expats residing in Bishkek

2) organisations (schools, companies, embassies) looking for a clinic to collaborate with for regular medical examinations (we offer yearly staff-checkups, special deals for students etc)

3) Hospitals, medical schools and residents and students: to collaborate with us in training residents and medical students.

Website requirements - Target customer

Demographic - locals and expats.

Age - probably more middle-aged and above, as younger ppl use instagram.

Income-level: middle-class and higher due to our pricing.

Interest - in medical services.

Comfort level with technology - low-medium.

Languages - english, kyrgyz and russian

Website requirements - unique offering

Evidence-based and international medicine.

Care for the whole family in one place, no need for expensive specialist consultations.
We try to limit unnecessary additional investigations.

Charitable heart of the clinic - mobile clinics in the regions.

Website requirements - design

- Professional. Informative. Uncluttered.

Color preferences: light background. Main colour would be yellow-orange (as in the logo). Secondary color grey (also as in logo)

Real photographs, not AI generated images

Website requirements - competitors and top 3

eldikfmc.com + approachable medical information (directed at you). - landing page too much text, quite cluttered, not up to date (many of the pictures are very old), no information on the team or history

greenlukas.uz + info on team with pictures. Feels less overwhelming at first site. - unclear if hospital or clinic? Several names (green lukas vs lukas clinic vs all friendship hospital - what is it)? In total very little info on site, and what is is quite confusing.

malish.kg + informative, including history and FAQ section. possibility to book consultation online - services section overwhelming

Website requirements - main sections

Home - tagline, buttons to book consultation and further discover website.
Maybe insta feed.
About - brief overview, history, what we bring to KG
Medical Services - consultations, labs etc
For corporate clients
For international patients
Team - short bio of team members (not only doctors)
?online booking
Medical education
Mobile clinics/charitable work
Contact

Website requirements - special requirements

Instagram feed

If possible to explore online booking system and how complicated that would be. Ideas -> form sends WA message to receptionist vs integration with openEMR

Easy way to keep it up to date - team changes, price changes, new photos etc

Website requirements - technical details

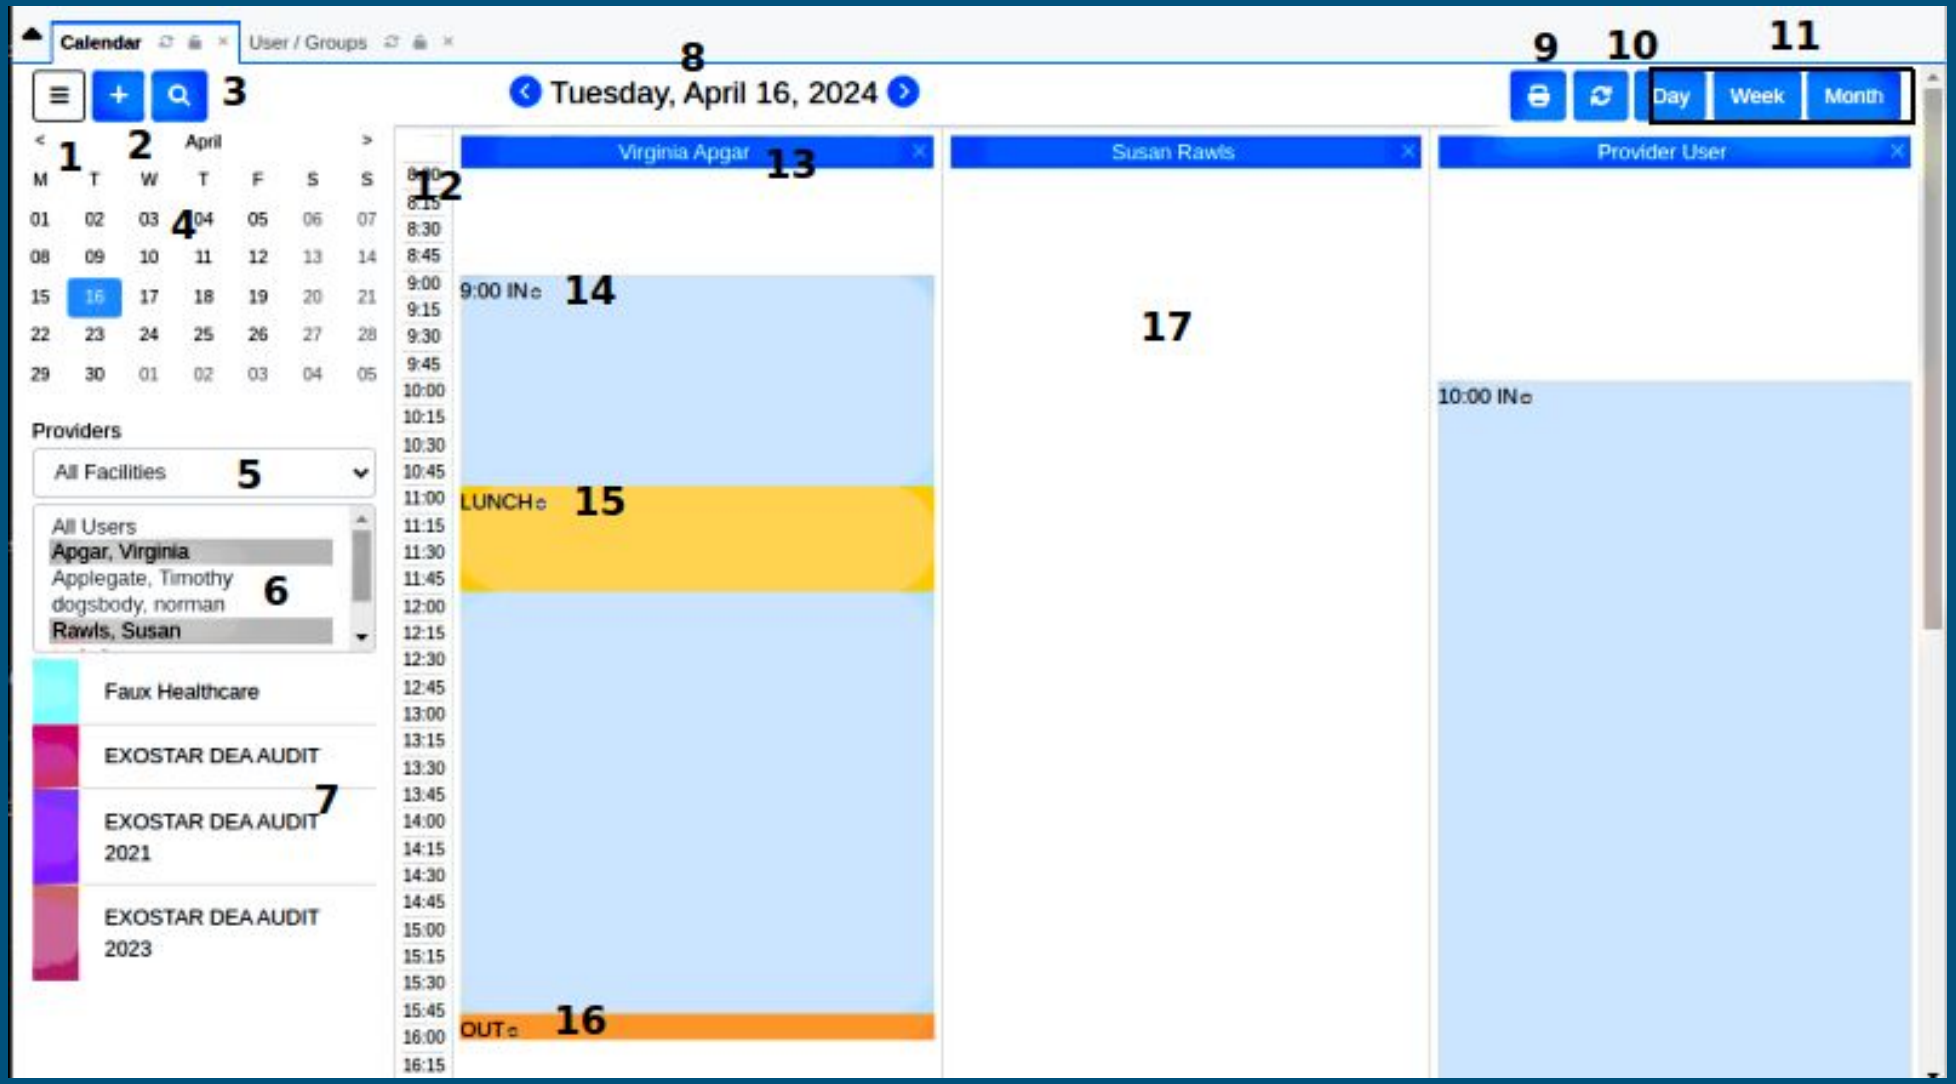

MercyMed has the domain: mercymed.kg

MercyMed has a rented server in Germany

The server has Apache, PHP and MySQL for Open-EMR

Also postfix for SMTP and Dovecot for IMAP

DNS is Hurricane's fee DNS
